DETAILED ACTION

Claims 31-64 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants' claims define a luminescent material layer that emits light upon activation with light. This is contrary to the dictionary definition of luminescence which is the emission of light by chemical action, friction or electrical action. Fluorescence is the emission of electromagnetic radiation by the absorption of radiation from another source.
